Chapter - 2
MANNER OF EXECUTION OF SUBSIDY PROGRAMMES
[Section 4 (1) (b) xii]

13.1 Describe the activities / programmes schemes being implemented by the public authority for which subsidy is provided.

Scheme:

GAP-Polambadi & Ind.GAP Certification

The program of GAP-Polambadi and Ind.GAP certification is implemented to bring sustainability in agriculture by adopting **Good Agricultural Practices (GAPs)** recommended by the State Agricultural University (SAU); and fostering Ind.GAP standards in the products to ensure food safety standards and providing a platform for obtaining better market price to the cultivators in the open market.

This program offers multiple benefits to the farmers like reduction in cost of production, increasing productivity, ensuring food safety standards in food products, enabling farm products to be more competitive on quality front and command a distinctly higher price in the market, bringing new platforms like ONDC to promote online trade of agricultural products etc, in agricultural sector.

Salient features of GAP-Polambadi & Ind.GAP certification

- **GAP-**Polambadi and Ind.GAP Certification is organized @ one program per each Mandal setting out an annual target of 1040 programs in 2025-26, sharing 625 programs to Kharif and 415 programs to Rabi 2025-26 with an outlay of Rs.10.00crores.

- GAP Polambadi is field based training imparted on participatory approach to 30 farmers, for 14 weeks in a crop season @ one session per week.

- Farmers are trained on Good Agricultural Practices (GAPs) enshrined in the concepts of Integrated Crop Management (ICM), Integrated Pest Management (IPM), Integrated Nutrient Management (INM), Integrated Weed Management (IWM), Water Management, Post harvest technology etc., in the training program.

- The MAO organizing the GAP-Polambadi has to conduct method demonstrations like collection of soil samples, seed treatment, preparation of NSKE, preparation of poison bait for rat control, preparation of T.viridi formulation for soil application etc., in the ICM Plot of Polambadi to show-case the technology of GAPs to the farmers

- The MAO has to organize field visits to show the Good Agronomic Practices like direct seeding in Paddy, formation of alleyways in Paddy, Water management practices, Weed management practices etc., to the farmers.

- Special topics on GAPs would be presented to the farmers in every Polambadi session.

- Farmers are constantly monitored to ensure to adopt GAPs in their fields.

- The farmers who are trained in GAP-Polambadi and practicing the GAPs would be affiliated to an FPO to implement Ind.GAP certification in group mode.

- The FPO representing a group of farmers registers' with the **Certifying Body (APSOPCA)** and complies all the requirements of Ind.GAP like auditing the FPO, internally inspecting farmers' fields, facilitating the CB to conduct external inspections of farmers fields, getting the farm products tested for Maximum Residue Limits (MRLs) of Pesticide residues, etc under this program.

- The farm product samples drawn by the APSOPCA would be analyzed at an NABL accredited laboratory for determining the MRLs of Pesticide residues, Aflatoxins, heavy metals, Melamine, Physical, Chemical and Bio factors; and the quality of the product in terms of food safety standards would be evaluated as per FSSAI standards.

- The APSOPCA, after evaluating the Laboratory reports of the registered product for food safety standards, and up on observing the compliance of all requirements envisaged in the Ind.GAP protocols would issue **Scope Certificate of Ind.GAP reckoning the degree of compliance demonstrated by the FPO concerned.**

- The FPOs organizing the Ind.GAP certification were imparted training on Digital Readiness Certification (DRC) Portal by the Quality Council of India to enable them manifest their readiness to access the online trading platforms like ONDC for e-commerce of agricultural commodities produced on certification standards.

Organization, Function and Duties

(Section 4(1)(b) -(i)

Particular of the Organization, functions and duties:

Sl. No.	Name of the Organization	Address	Function & Duties
1.	Crop Insurance Section, Department of Agriculture	O/o. C&DA, A.P, IHC, Mangalagiri	Nodal Department for implementation of Crop Insurance Scheme. Responsible for preparation of proposals for issuance of Notification of Crops & Monitoring overall implementation of Crop Insurance Scheme in A.P by coordinating with various stake holders.

CROP INSURANCE: BRIEF NOTES

- Crop insurance is the primary risk management tool in Agriculture.

- Pradhan Mantri Fasal Bima Yojana (PMFBY), launched in 2016, replacing older crop insurance schemes (NAIS, MNAIS, WBCIS). Farmers' share of premiums was set at 2% for Kharif, 1.5% for Rabi, and 5% for commercial/ Horticulture crops, with the remaining premium equally subsidized by State, GOI.

- AP State implemented Pradhan Mantri FasalBima Yojana (PMFBY) & Restructured Weather Based Crop Insurance Scheme (RWBCIS) from Kharif 2016 to Kharif 2019. During Kharif 2019, the Govt announced a Free Crop Insurance scheme under PMFBY, with farmers paying a premium of Rs.1/-Still, the object of Universal coverage of Notified Crops could not be achieved due to some limitations like timelines in enrolment etc.

- From Kharif 2020, the state implemented its own scheme based solely on e-Panta data for all notified crops, and settled claims for Kharif 2020,21 directly, without involving any insurance companies. Recognizing the importance of risk-sharing, the state resumed PMFBY implementation from 2022 onwards.

- Thus, AP became the first state to achieve Universal coverage of notified crops.All the notified crops which were captured through e-crop and biometric authentication, automatically provided insurance protection and the State Govt. shouldered the entire claim settlement responsibility.

- PMFBY operates as an index-based insurance scheme, with claims settled based on final yield estimates obtained through Crop Cutting Experiments (CCEs).

- Restructured Weather Based Crop Insurance Scheme (RWBCIS) is also implemented in the State along with PMFBY where the claims will be settled based on Weather parameters.

Action plan for 2025-26

In an effort to improve the implementation of the crop insurance scheme, State Govt formed a three-member Cabinet Sub-Committee (CSC) with the Hon’ble Ministers for Agriculture, Finance, and Civil Supplies to review and suggest way forward by adhering to the guidelines stipulated. The CSC conducted a comprehensive review of the bidding results, preparedness, farmer accessibility, and other relevant factors during their review meeting conducted on 22July 2024.

After extensive deliberation, CSC made certain recommendations which have been subsequently approved, as per which, PMFBY will be implemented for 2 years, by adopting the Alternative Risk Sharing Model (ARSM) 60-130 Cup & Cap at season/ cluster level. The Free insurance universal coverage model based on e-panta will continue for Kharif 2024 while subsequent seasons enables voluntary enrolment by the farmers. The notification for coverage of Crops under PMFBY & RWBCIS issued by the Govt for PMFBY & RWBCIS.

District/ scheme wise list of Crops notified for coverage during 2025-26 furnished as follows:

7	Rodent Control Programme	In the coastal districts of Andhra Pradesh, paddy crop cultivation is carried out throughout the year followed by summer pulses and thus the environment is congenial for rodent breeding. Rodents damage the Rice crop right from the nursery stage to harvesting of the crop, however maximum damage is caused during panicle initiation stage. The main objective of implementing Rodent Control Programme in Paddy fields is to reduce the yield losses due to rodents and also to produce quality food grain. During 2025-26, Rodent Control Programme is implementing in 13 Districts i.e East Godavari,	Proposal submitted to GOI under RKVY 2025-26	GOI

Rodent Control Programme: During 2025-26, Rodent Control Programme is implementing in 13 Districts i.e East Godavari, Kakinada, Konaseema, West Godavari, Eluru, Krishna, NTR, Guntur, Palnadu, Bapatla, Tirupati, Nandyal and SPSR Nellore districts with a budget allocation of Rs. 248.58 lakhs to cover an area of 15.29 lakh ha under RKVY. The main objective of implementing Rodent Control Programme in Paddy fields is to reduce the yield losses due to rodents and also to produce quality food grain.

Under this programme the Rodenticide chemical i.e Bromadiolone (0.25% CB) is being distributed to the Schedule Caste, Schedule Tribe and general farmers on 100% subsidy @ 8 to 10 gm/ha depending on the severity of rodent infestation and the whole village area is proposed to be covered. The farmers have to use their own bait material (broken rice & vegetable oil) for mixing with the rodenticide chemical i.e Bromadiolone chemical(0.25%CB) and placing in the rodent burrows. In this Programme Bromadiolone(0.25%CB) chemical is distributed to the farmers on free of cost and the

whole village area is covered.

MANNER OF EXECUTION OF SUBSIDY PROGRAMMES
[Section 4 (1) (b) xii]

Describe the activities / programmes schemes being implemented by the public authority for which subsidy is provided.

National Food Security and Nutrition Mission (NFSNM)

Introduction:

National Food Security and Nutrition Mission (NFSNM) earlier NFSM) is a Centrally Sponsored Scheme with funding pattern of 60:40 between Centre and State. The scheme has five sub components

The details are as follows:

a. NFSM – Rice,
b. NFSM – Pulses,
c. NFSM – Coarse Cereals (Maize)
d. NFSM – Nutri-cereals
e. NFSM – Commercial Crops (Cotton,Mesta, Sugarcane)

Objectives of the scheme:

1. Increasing production of rice, pulses, coarse cereals, Nutri-cereals, Cotton and Oilseeds through area expansion and productivity enhancement in a sustainable manner in the identified districts of the country;
2. Restoring soil fertility and productivity at the individual farm level; and
3. Enhancing farm level economy (i.e. farm profits) to restore confidence amongst the farmers.

Component wise interventions under NFSNM:

S.No.	Components	Interventions covered
1	Rice	• Demonstrations (Cluster demonstrations & Cropping System based demonstrations); • Distribution of Certified Seeds; • Integrated Nutrient Management; • Integrated Pest Management; • Trainings to farmers; • Local Initiatives (Any initiatives not covered above).
2	Pulses	• Demonstrations (Cluster demonstrations & Cropping System based demonstrations); • Distribution of Certified Seeds; • Production of Seeds; • Integrated Nutrient Management; • Integrated Pest Management; • Trainings to farmers; • Local Initiatives (Any initiatives not covered above).

3	Coarse Cereals (Maize)	• Demonstrations (Cluster demonstrations & Cropping System based demonstrations); • Distribution of Certified Seeds;
4	Nutri-cereals (Millets other than maize)	• Demonstrations (Cluster demonstrations) • Distribution of Certified Seeds; • Production of Seeds; • Farm Machinery & Irrigation Tools; • Trainings to farmers; • Local Initiatives (Any initiatives not covered above).
5	Cotton	• Demonstrations (Front Line demonstrations) • Trainings to farmers; • Local Initiatives (Any initiatives not covered above).

National Mission on Edible Oils and Oil Seeds (NMEO-OS):

1. Introduction: Government of India(GoI) has launched the New scheme, "The National Mission on Edible Oils-Oilseeds (NMEO-OS)" This is a new mission sanctioned by the GoI as a Centrally Sponsored Scheme(CSS) under Krishonnati Yojana (KY) of the Dept.of Agriculture & Farmer's Welfare (DA&FW) from 2024-25 to 2030-31.

2. Objectives: The NMEO-OS scheme is strategically designed to reduce India's reliance on imported edible oils, and drive towards "Atmanirbharta" by boosting domestic oilseed production and improving farmer incomes.

3. Aims:

    1. Harness innovations: Utilizing already available and early-maturing innovations and technological breakthroughs for addressing the yield gap.
    2. Accelerate dissemination: Promoting the rapid dissemination of improved seed varieties (released in the last five years) and technologies within crop-specific clusters involving cooperatives, FPOs, and the private sector.
    3. Targeting expansion: Encouraging the expansion of oilseed cultivation in fallow areas specially in eastern states and promoting intercropping through demonstrations.
    4. Increasing availability of improved seeds: Addressing deficiencies in the seed production and distribution system to ensure availability and accessibility of quality seeds.
    5. Enhance market access: Linking oilseed farmers and value chain partners (VCPs) with processors to improve their market access and ensure better returns.
    6. Support extraction and collection of secondary oilseeds: Bolstering the production of secondary oilseeds and Tree Borne Oils (TBOs) through targeted interventions.

4. Activities under NMEO-OS scheme:

I . i) Value Chain Clusters(VCC) Clusters Formation:

The minimum cluster size should be maintained as follows:

a) Major oilseed crops (Groundnut, Soybean): 500 ha,

b) Minor oilseed crops (Sesame, Sunflower, Safflower & Castor): 200 ha,

c) Exclusive clusters for FRA holders:100 ha for any major/minor oilseed. However, FRA patta holders can also be part of any other cluster.

ii) Provision of Free Seed @ 100% subsidy under VCC:

iii) Components under VCC:

S.No.	Activity
1.	Distribution of Certified Seed (Groundnut, Soybean, Sesamum, Castor, Sunflower & Safflower)
2.	Farmers Trainings
3.	Farmer Field Schools
4.	Management & Outreach Assistance
5.	Soil Testing Support
6.	Krishimapper Support

5. Post-harvest Value Chain Support: Machinery & Equipment for Oil extraction units (10-ton capacity) and processing of oilseeds and 33% of the project cost up to a maximum of Rs. 9.90 lakhs.

II. Block Demonstrations(BDs):

i) BDs shall be organized in cluster mode with a contiguous area of 20 ha in a village/ villages/ block except hilly regions/terrains, where the size of the cluster should not be less than 10 ha.

ii) One demonstration shall be allowed to one farmer with a ceiling of 1 ha under each crop. The assistance will be on pro-rata basis with the reduction in area as per availability of land with individual farmer.

6. 2025-26 Action Plan & Share of assistance:

S.No	Activity	Assistance(GoI : State)
1.	Purchase of Breeder Seed	100% GoI
2.	Assistance for SAU for constructing specilized tempreture controlled seed storage unit for Sesamum at Agricultural Research Station(ARS),ANGRAU,Yelamanchili,Anakapalli Dist	100% GoI
3.	Seed Hubs for Sesamum,ARS,ANGRAU,Yelamanchili,Anaskapalli	100% GoI
4.	Support for Value Chain Cluster	60:40
5.	Block Demonstrations	60:40
6.	Post-Harvest Infrastructure and Support for Primary Sources as well as Secondary Sources	60:40

7.	Flexi funds	60:40

Chapter1
Introduction

Primary Function of e-Panta

The primary function of e-Panta, implemented by the Government of Andhra Pradesh, is to digitally record the crop details of crops grown in different seasons farmers and accurately assess the actual cultivation status. Through this system, details such as each farmer's land, crop type, sowing date, and cultivated area are recorded at the village level using a mobile application with geo-tagging, by field staff.
This data is effectively used to ensure transparency and direct delivery of government services such as subsidies, crop insurance benefits, input support, procurement etc., The main objective of e-Panta is to enable data-driven decision-making in the agriculture sector, provide error-free crop statistics, and enhance the efficiency of farmer welfare schemes across the state.

NORMS SET FOR THE DISCHARGE OF FUNCTIONS
[Section 4 (1) (b) (iv)]

CITIZEN`S CHARTER

The Soil Health Card (SHC) and Soil Health Management (SHM) schemes have been merged with the **"Rashtriya Krishi Vikas Yojana (RKVY)"** starting from the financial year 2022-23. This combined scheme is now referred to as the Soil Health and Fertility component of the RKVY Scheme.

The main objective of this scheme is to support states in promoting Integrated Nutrient Management (INM). This involves the judicious use of chemical fertilizers, including secondary and micronutrients, in conjunction with organic manures and bio fertilizers. The aim is to improve soil health and productivity.

The Soil Health Card provides farmers with valuable information about the nutrient status of their soil. It also offers recommendations on the appropriate dosage of nutrients to be applied to enhance soil health and fertility.

Soil sample collection, processing, analysis and issue of Soil Health Card to individual farmers with details of personal information, soil health parameters and recommendation within 25 days of soil sample collection. Creation of awareness among the farmers about the Soil Health Card parameters and the recommendations given at the time of issuing of Soil Health Card for soil and crop management.

FLOW CHART

1. Soil Sampling :25-30 representative samples of 1/2 kg (composite of 3 samples) per day (April-June) or (October-November) per soil survey group.

2. Soil Sample Processing : Drying, removing impurity/mixing/labelling, grinding and storing 100-150 samples/week

3. Soil Sample Analysis: 100 samples/week (20-25 samples per day) pH, EC, Organic C, Available N, P, K, S, Fe, Mn, Zn, Cu and B as per standard lab procedure

4.**Generation of Soil Health Card (SHC) :**100 SHC in 2 days by data entry, preparation and printing

5. Farmers awareness campaign on SHC :250 Farmers in One month (Through training programmes, mass awareness campaign and use of social media etc.)
